Do you use Exo and sell your products on eBay?

Introducing Exo2eBay!

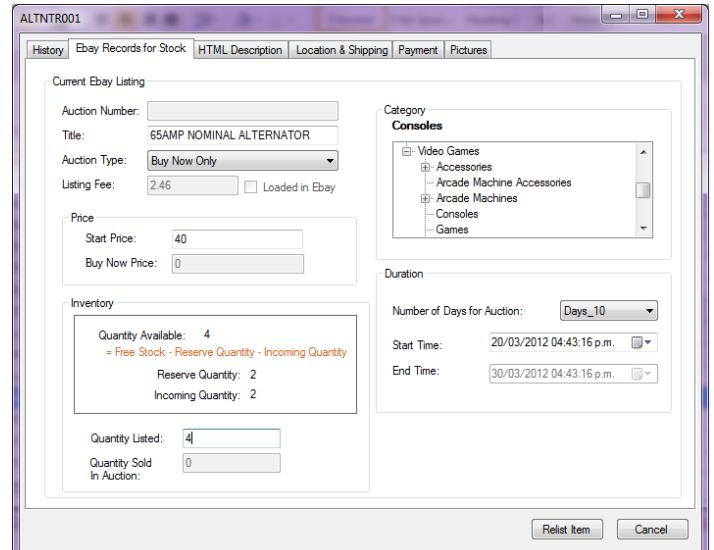

Benefits:

- ✓ Quickly creates auctions from Exo stock items, on eBay
- ✓ Creates Sales Orders in Exo when the item has been through checkout
- ✓ Creates Payment Receipts in Exo when an item has been paid by PayPal

If you are using eBay as your online store you want items being auctioned as frequently as possible. It can be a time consuming, if not tedious task, especially when you have large numbers of items to list.

Listing the item is only the first step, you need to monitor the sales on each auction, create sales orders or invoices in Exo, match payments as they come in as well as despatch goods once paid. Exo2eBay can handle most of that for you automatically.

Monitor for auction sales, buy now orders and unsold auctions. Creating the Sales Order in Exo and if payment is made, the invoice and payment as created and matched. That leaves you with the despatch from Exo. Does this sound simpler?

Want to know exactly how much your assets cost to run?

The screenshot shows the 'Asset Details (Professional)' application window. On the left, there's a tree view of asset locations under 'Auckland (AKL)'. The main area displays a grid of asset details with columns for Asset Code, Description, and Status. A specific row for '2008 Ford AXLger 4 x 4 - Reg TGJ546' is highlighted. Below the grid, there's a transaction history table and a navigation bar at the bottom.
